Executive Summary

Seasoned IT professional with 9.5 + years of experience spanning technology product / project management, **BFSI, Gen AI**, and go-to-market (GTM) strategies to deliver Digital Transformation Projects.

I have successfully led cross-functional teams through the entire product lifecycle from ideation and strategy to execution and launch. Seeking role as a **Program Manager or Project Manager or Delivery Manager** with expertise in strategic planning, stakeholder Management, market research, pre- sales, product vision, strategy, and process compliance.

Profile Summary

- Successfully led and delivered **multiple large-scale** programs across diverse industries, managing projects from initiation to completion.
  My expertise lies in product development, global project management, **BFSI, Gen AI** and stakeholder collaboration, with a strong focus on building lasting client relationships and driving customer retention.
- Specialized in managing projects with varied pricing models, such as Fixed Price and Time & Material, by leveraging **Waterfall**, **Agile/Scrum**, and **Hybrid methodologies** to ensure efficient and successful delivery.
- Experienced in leading cross-functional teams and building strong collaboration among stakeholders to achieve successful project outcomes. Skilled in strategic planning, stakeholder management, and quality assurance, ensuring projects are delivered smoothly from start to finish.
- **Led end-to-end development and launch of data-driven digital products** in the **BFSI/Fintech** sector, driving innovation and ensuring seamless execution from concept to market release.
- **Enhanced operational efficiency** by streamlining workflows and optimizing resource allocation, delivering **cost-effective, scalable, and high-performing project management processes.**

Core Competencies

PROJECT MANAGEMENT:

Project Planning | Stakeholder Management SDLC | Resource Allocation | Jira | MS Project Risk Management | Agile/Scrum | Sprint Planning | Backlog Grooming | RAID | RACI Delivery Management | Change Management

BUSINESS ANALYSIS & PRODUCT MANAGEMENT:
