✓ **Australian Work Rights: Active Subclass 482 (Temporary Skill Shortage) Visa**

PROFESSIONAL SUMMARY

Product Manager with 7 years of experience building and scaling data-driven products for 10M+ users in regulated digital environments. Proven track record of owning product strategy end to end, shipping AI-enabled products with engineering teams, and driving measurable outcomes against clear KPIs and OKRs. Builder at heart — equally comfortable taking products 0→1 from scratch and scaling them 1→n, with a bias for action and a relentless focus on customer impact. **Worked on GenAI, Agentic AI, LLMs, Python.**

CORE COMPETENCIES

Methodology	Agile | Scrum | Kanban | PI Planning | Design Thinking | Lean | Go-to-Market | 0→1 Product Building
PM Skills	Product Strategy | Product Roadmap | Product Discovery | User Stories | Acceptance Criteria | KPI/OKR Definition | Data-Driven Decisions | Prototyping | PRD | Experimentation | VoC
Technical	JIRA | Confluence | Miro | UI/UX | API | SQL | Power Automate | GenAI | Agentic AI | LLMs | Python
Domain	BFSI | Fintech | Payments | IAM | Open Banking | Retail Banking | Cards & Payments | Identity
Delivery	Roadmap Prioritisation | Product Lifecycle Management | Cross-Functional Leadership | Stakeholder Management | Release Management | Scale & Performance

PROFESSIONAL EXPERIENCE

AI Product Manager & Automation Lead | Capgemini — ANZ Banking Group *Jan 2026 – Present*

Gurugram, India / Melbourne, Australia

- **Own product strategy for AI automation** across ANZ Retail and Business Banking, shipping data-driven products that reduced operational overhead and improved incident resolution turnaround for 10M+ customers.
- Transformed (1→n) a manual risk profiling and sentiment analysis process into **an AI-driven capability,** converting signals from millions of customer interactions into product intelligence that informs strategy and reduces regulatory risk exposure.
- Drove root-cause analysis and resolution of executive and regulatory escalations end to end, defining KPIs and maintaining 100% SLA adherence across all streams — demonstrating deep ownership under pressure.
- **Using AI to convert raw data into product decisions: GenAI to synthesise signals** from millions of customer interactions into actionable product intelligence. This directly informs which features to prioritise, where the biggest risks are, and what the next product roadmap should focus on.
- Partnered with engineering, design and business stakeholders to shape AI-enabled product roadmaps, turning ambiguous problems into prioritised, outcome-driven backlogs with measurable OKRs.

Technical Product Manager & Senior BA | Capgemini — ANZ Banking Group (Onshore) *Mar 2025 – Dec 2025*

Melbourne, Australia

- Owned the end-to-end product lifecycle from ideation to deployment for the Voice ID Cloud Migration as a large-scale 1→n implementation, re-architecting infrastructure, rebuilding API integrations and migrating from on-prem to cloud, shipping a production-grade product on time for millions of customers with zero service disruption.
- Turning customer sentiments into early warning signals with ANZ Bank: I use **GenAI to automatically analyse thousands of customer complaints,** risk events and sentiment signals across ANZ's banking products. Instead of a team manually reading through feedback, the **AI surfaces patterns** and themes in real time
- Automating repetitive workflows so teams focus on higher-value work: identifying manual, rule-based processes within banking operations and replace them with **AI-driven automation and Agentic AI**
- 5. Validation of PRDs, BRDs, User Stories, Acceptance Criteria and Solution Designs
- Drove solution design reviews with Enterprise Architects across 4+ engineering squads, validated NFRs and component artefacts, and governed all Agile ceremonies to ensure scale, performance and production readiness.

Techno-Functional Business Analyst & Journey Expert | Capgemini — ANZ Banking Group *Sep 2019 – Mar 2025*

Pune, India

- Owned product discovery for ANZ's Customer Identity platform serving millions of users as Journey Expert and Scrum Master, defining product strategy and shipping 500+ user stories grounded in user research across 3 cross-functional squads.
- Launched an Open Banking platform enabling secure, API-led integrations with third-party partners, and a self-service Credential Recovery product that improved engagement and reduced contact centre volumes by 20%+.
- Onshore, Melbourne: Led audit readiness across critical assets, strengthening governance and compliance controls, and delivered a 0→1 proof of concept on Privacy reforms and Automated Decision-Making.

EDUCATION & CERTIFICATIONS

B.Tech – Electrical Engineering | Thapar University | 2015–2019

- Oracle Certified Java Associate (OCJP) — Java SE8
- Agile with Atlassian Jira — Agile Methodology & Scrum
- IBM AI Product Manager
- CBAP — Certified Business Analysis Professional (In Preparation)

HONORS & AWARDS

☆ **Star of the Month (Capgemini)** — Exemplary contribution to team performance and delivery outcomes

☆ **Customer Delight Award (Cards & Payments)** — Consistently delivering high professional results with measurable business impact

KEY PROJECTS

AI Sports Scouting Platform
Built 0→1: AI-powered analytics platform to surface uncapped cricket talent using Python, SQL and Agentic AI workflows.

Voice ID Cloud Migration
Scaled 1→n: re-architected infra and API integrations, migrating ANZ's 2FA from on-prem to cloud with zero service disruption.

Open Banking – CDR Compliance
Launched ANZ's Open Banking platform enabling API-led data integrations aligned to Consumer Data Right legislation.
