- FSD
- Fintech
- Linux
- Omni Channel
- Funnel Analysis
- Digital Transformation

CERTIFICATION

- Training certificate of BHEL(EDN) Bangalore.

WORK EXPERIENCE

Business Analyst Lead - AU Small Finance Bank **Sep 2023 - Apr 2026**

Digital Transformation & Ecosystem Integration:

Onboarding Digitization: Spearheaded the digitization of CASA onboarding for New-to-Bank (NTB) and Existing-to-Bank (ETB) customers within the LOS, significantly reducing Turnaround Time (TAT).

Identity & Security: Enabled UIDAI Face Recognition services and automated (Aadhaar Redacted) masking protocols to ensure 100% regulatory compliance and secure digital identity verification.

Paperless Loan Execution: Architected the end-to-end digital documentation journey, integrating eStamping, eSign, and eMandate (e-NACH) to achieve a 100% paperless loan disbursement process.

Account Aggregator (AA) Implementation: Led the integration of Account Aggregator frameworks to automate bank statement analysis, replacing manual uploads with real-time, consent-based data fetching.

One Bank One KYC (OBOK): Designed and implemented the OBOK journey, unifying the KYC experience across all retail products to eliminate redundant documentation and enhance the customer experience.

Core Project Leadership & Stakeholder Management:

Led end-to-end project lifecycles for Rapid LOS products (Micro Business Loan, Home Loan), ensuring alignment between high-level business objectives and technical API delivery.

Facilitated cross-functional collaboration between Product, Risk, Credit and Operations to drive the implementation of large-scale lending initiatives, including MSME, LAP, and Mudra loans.

Credit Risk & Business Rule Engine (BRE) Management:

Managed the Business Rule Engine (BRE) and FICO integrations to automate complex credit policies, pricing logic, and risk appetite, reducing manual underwriting by 40%.

Oversaw comprehensive regression testing for MSME, LAP, ATL, Mudra and HL products, ensuring the accuracy of rule-based logic within the LOS.

Operational Excellence & Knowledge Leadership:

Championed knowledge transfer by developing and delivering "Knowledge Series" training for Credit and Underwriting teams to maximize their proficiency in BRE functionalities.

Authored and maintained high-quality functional documentation and BRDs, serving as the "single source of truth" for technical and business teams.

Functional Manager / Business Analyst - HDFC Bank Limited **Dec 2022 - Sep 2023**

Executed comprehensive functional testing to identify, analyze, and resolve bugs in APIs and related services.
Led the development and maintenance of detailed documentation, including process flow diagrams, test cases, and API lifecycle artifacts.
Supported microservices, cloud services, Open Banking APIs, and orchestrated services throughout their lifecycle, ensuring seamless operation and integration.
Coordinated cross-functional collaboration among internal IT teams, vendors, and external partners to maintain solution consistency, integration, and project delivery within defined timelines.
Collaborated with technical teams to enforce adherence to architectural standards and integration constraints.
Conducted API User Acceptance Testing (UAT) to validate that solutions meet business requirements and comply with technical standards.

Deputy Manager / Business Analyst Grade 2 - ICICI Bank Limited **Apr 2021 - Nov 2022**

International Application Ownership: Led end-to-end ownership of Finacle across multiple international geographies, ensuring core banking stability, continuity, and strict alignment with regional Retail Banking requirements.

Global Remittances & APIs: Designed and maintained APIs for Finacle-related services, specifically optimizing international remittance workflows and digital payment integrations to ensure high performance and adherence to global standards.

Lifecycle & ITIL Management: Orchestrated the full lifecycle of critical business applications within the ITIL framework, managing incident, problem, and change management activities to maintain 99.9% system availability.

Automated Statement Operations: Managed the end-to-end digital generation of monthly and quarterly statements, coordinating with global stakeholders to ensure timely and accurate delivery for international retail customers.

International Compliance & Audit: Spearheaded audit and compliance activities for overseas branches, preparing technical documentation and ensuring the swift closure of observations from international regulatory bodies.

Security & Risk Mitigation: Oversaw comprehensive security testing and vulnerability reporting, collaborating with technical and risk teams to harden application security across global retail platforms.

UAT & Release Excellence: Planned and executed User Acceptance Testing (UAT) and sanity testing for complex application upgrades, ensuring zero-defect deployments through close collaboration with business and technical squads.

Strategic Reporting: Developed executive dashboards and real-time status reports to track project milestones and application health, providing management with actionable insights into global operational efficiency.

Deputy Manager / Business Analyst Grade 1 - ICICI Bank Limited **Aug 2018 - Mar 2021**

Digital Journey Optimization: Spearheaded the digitization of NRI investment workflows within the PINS application, transitioning manual onboarding steps into automated digital journeys to enhance the experience for global customers.

Real-Time Risk Automation: Orchestrated the digital transformation of the LTS (Limit Tracking System), moving from legacy tracking to real-time, API-based exposure monitoring for partner bank limits.

Process Digitization (PForm): Led the initiative to digitize manual approval workflows within the PForm application, implementing automated user reconciliation and validation protocols that reduced manual errors by 30%.

Strategic Application Governance: Served as the end-to-end Application Owner for PINS and LTS, ensuring 99.9% system availability while aligning technical roadmaps with the bank's "Digital-First" retail strategy.

Data Integrity & Compliance: Automated the user access review process to ensure 100% accuracy in data consistency, maintaining strict compliance with RBI and SEBI digital banking mandates.

KPI & Performance Analytics: Developed digital dashboards for real-time KPI tracking, providing stakeholders with actionable insights into application health and operational throughput.

Cross-Functional Leadership: Collaborated with IT and Product squads to integrate new digital features into existing trading and limit-management platforms, overseeing the full SDLC from requirement gathering to production.

Probationary Officer / Business Analyst - ICICI Bank **Aug 2017 - Aug 2018**

Assisted in planning, scheduling, and tracking projects to support timely and organized delivery of initiatives.
Collaborated with internal stakeholders and clients to analyze requirements and ensure alignment with project objectives.
Owned and maintained the PFORM application used by domestic branches for recording monthly income and expenditure, supporting accurate data capture and reporting.
Managed user reconciliation activities within the PFORM application to ensure completeness, consistency, and proper user activity tracking.

Senior Transaction Processing Associate - TouchOne Technology Pvt. Ltd **May 2015 - Feb 2017**

Managed end-to-end document classification, data processing, and secure transmission of deliverables to clients.
Verified data accuracy against source documents and internal guidelines to minimize errors in transaction processing.
Ensured strict compliance with client contract requirements, regulatory standards, and internal quality controls.
Coordinated with internal teams to resolve data issues and maintain continuity and reliability of transaction workflows.
Participate in process improvement initiatives to enhance efficiency, accuracy, and automation in transaction processing.
Ensure adherence to regulatory requirements, internal controls, and risk management policies.
Train and mentor junior team members on standard operating procedures and best practices.
Prepare and review daily, weekly, and monthly operational reports for management and audit purposes.
Monitor transaction queues and prioritize workload to meet cut-off times and service targets.
Review, validate, and authorize payment instructions, ensuring proper documentation and approvals.
Perform daily reconciliations, identify breaks, and resolve discrepancies with internal and external stakeholders.
Process high-volume financial transactions accurately within defined SLAs and compliance standards.

Transaction Processing Associate - Iconversation Telesolutions Pvt. Ltd **Oct 2013 - Apr 2015**

Performed core data entry of transaction information with a strong focus on accuracy, completeness, and compliance with established procedures.
Verified transaction details and documentation to identify discrepancies, resolve data issues, and support smooth transaction processing.
Researched and resolved data and processing problems by reviewing source information, clarifying inconsistencies, and updating records as needed.
Labeled and categorized data used to train AI bots, ensuring consistent annotation to support automation and improve processing reliability.
Collaborated with team members to flag complex cases, share findings, and support continuous improvement of data quality and processing workflows.
Participating in process improvement initiatives to streamline workflows and reduce transaction processing errors.
Communicating with internal stakeholders to obtain missing information and clarify transaction-related issues.
Adhering strictly to regulatory, compliance, KYC, and data privacy requirements during all transaction activities.
Performing daily reconciliations between internal records and external statements to identify and rectify mismatches.
Reviewing and resolving transaction discrepancies, escalations, and exceptions following defined procedures and approval matrices.
Processing high-volume financial transactions accurately within defined turnaround times and service level agreements.

PROJECTS

End-to-End Digital Lending Transformation (Rapid LOS) **6 Months**

Objective: Conceptualized and deployed a high-speed Loan Origination System (LOS) for Micro Business and Home Loans.
Key Deliverables: Integrated FICO Business Rule Engine (BRE) to automate credit decisioning and utilized API-based bridging to connect the LOS with the Core Banking System (CBS) & another channles.
Impact: Reduced manual underwriting effort by 40% and achieved a seamless digital journey for retail lending products.

Unified "One Bank One KYC" & Onboarding Ecosystem **3 Months**

Objective: Designed a frictionless CASA onboarding journey for both New-to-Bank (NTB) and Existing-to-Bank (ETB) customers.
Key Deliverables: Implemented the Account Aggregator (AA) framework for instant financial profiling and automated CKYC fetching to eliminate redundant documentation.
Impact: Established a single, reusable KYC profile ("One Bank One KYC") across all retail assets, improving customer acquisition speed.

India Stack Integration & Compliance Automation **8 Months**

Objective: Leveraged the Digital India ecosystem to build a 100% paperless documentation and verification suite.
Key Deliverables: Enabled UIDAI Face Recognition and automated Aadhaar Masking to meet stringent regulatory security standards.
Digitized the final execution layer using eStamping, eSign, and eMandate (e-NACH) for automated collections.
Impact: Shifted the bank toward a "Zero-Paper" workflow, significantly reducing operational costs and document rejection rates.

EDUCATION

2018 **PG Diploma | Banking**
Manipal Academy of Higher Education (MAHE)
Grade - 6/10

2013 **B.Tech / B.E. | Electronics and Telecommunication Engineering**
Rajasthan Technical University, Jaipur
