Tausif Sayyed

Technical Program Manager | BFSI, OFSAA & Fintech Specialist

Mumbai | +91-7841914829 | Shahidsayyed2014@gmail.com LinkedIn: https://www.linkedin.com/in/tausif-sayyed/

PROFESSIONAL SUMMARY

Technical Program Manager with 14+ years of experience across Banking, BFSI, Fintech, and Payments, working with leading banks including HSBC, HDFC Bank, ICICI Bank, and Axis Bank. Strong expertise in Oracle OFSAA modules including ALM, LCR, NSFR, CAPAD, FTP/PFT, Liquidity Risk, and regulatory reporting aligned with RBI and Basel frameworks. Experienced in reconciliation, ALM exception reporting, SQL/ETL, data validation, UAT/SIT, regulatory reporting, and end-to-end banking data lifecycle management.
Skilled in Business Analysis activities including requirement gathering, BRD/FRD preparation, gap analysis, stakeholder management, workflow analysis, and coordination with Business, Risk, Treasury, Finance, and IT teams for successful implementation and regulatory reporting delivery. Proven track record in production support, RCA, OCI migration, Agile delivery, and driving process improvements across OFSAA, lending, treasury, and digital payment platforms.

CORE SKILLS

Project & Delivery Management:
Requirement Gathering | BRD/FRD Preparation | Gap Analysis | Workflow Analysis | Functional Documentation | Stakeholder Management | Agile/Scrum | Jira | Sprint Planning | Release & Change Management | Risk & Vendor Management |

ALM, Risk & Regulatory Reporting
Asset & Liability Management | Liquidity Risk | LCR | NSFR | FTP/PFT | CAPAD | Basel & RBI Compliance | ALM & GL Reconciliation | Financial Reporting |Data Governance

Banking & Financial Domain
Retail & Corporate Banking | Investment Banking | Credit Cards | Credit Risk & Lending Lifecycle | KYC/AML | Digital Payment (UPI, Cards, Wallets) | PSP Integration

Data, ETL & OFSAA Processing:
OFSAA Data Lifecycle | Data Analytics | T2T Transformations | Data Mapping | Data Validation & Recon |Data Migration

Technical & Reporting Tool
API Integration | Postman | Databricks | OBIEE Reporting | OCI Cloud | Automation | AI/ML | GenAI (ChatGPT/Copilot) | Performance Optimization

Testing, Validation & Implementation
UAT | SIT | Regression Testing | Post-Live Verification (PLV) | Test Case Design & Execution | Defect Management | Business Validation | Root Cause Analysis (RCA) | Production Support | Incident Management | Batch Monitoring | SLA

PROFESSIONAL EXPERIENCE

Program Manager (OFSAA) | Wipro (Client: ICICI Bank) | Mumbai, India 03/2024 – Current

- Managed banking operations and regulatory reporting (LCR, ALM, CAPAD) aligned with RBI and Basel guidelines ensuring compliance and data accuracy
- Managed end-to-end Liquidity Risk Reporting activities for LCR and NSFR including data validation, reconciliation, exception handling, and regulatory reporting submissions aligned with RBI/Basel guidelines.
- Performed SQL-based data sourcing, reconciliation, and root-cause analysis across OFSAA and banking systems to identify reporting breaks, validate liquidity metrics, and improve reporting accuracy
- Led end-to-end delivery lifecycle for OFSAA modules and banking applications including requirement gathering, BRD/FRD preparation, data mapping, UAT, release management, and translating business needs into system solutions in collaboration with business, risk, and operations teams.
- Designed and executed UAT test cases, SIT validations, regression testing, and Post-Live Verification (PLV) activities covering Liquidity Coverage Ratio (LCR), Net Stable Funding Ratio (NSFR), and other key risk metrics.
- Oversaw transaction data processing, reconciliation, and GL integration ensuring accuracy across financial reporting systems
- Performed SQL/PL-SQL based data validation, reconciliation, and issue resolution across large-scale banking datasets
- Monitored daily/month-end batch processing and automated workflows ensuring >98% SLA adherence
- Handled production support, incident management & root cause analysis for banking systems & data pipelines
- Coordinated with cross-functional teams (Banking Operations, Risk, Compliance, IT) to resolve issues and improve process efficiency
- Ensured compliance with regulatory frameworks, audit requirements, and data governance standards
- Worked closely with ETL teams to understand and validate ETL logic, source-to-target mappings, transformation rules, and data loading processes for various banking products in ALM systems.
- Led stakeholder communication and delivery management across business, operations, and technology teams.

KEY ACHIEVEMENTS

- Achieved 99.5%+ batch success rate, reducing failures by 40% through proactive monitoring and optimization.
- Reduced production incidents by 30% via RCA-driven fixes and preventive controls.
- Delivered OCI migration successfully under aggressive timelines with zero data loss and full compliance.
- Ensured consistent delivery of multi-region regulatory processes (India, UK, Canada) under high-pressure timelines.
- Enhanced data validation and anomaly detection using Databricks and AI-driven insights.
- Supported ALM, CAPAD/Basel, FTP, PFT, LCR/LRM validation and regulatory calculations, strengthening data accuracy and reporting reliability.

Senior Project Manager | Synoriq R&D Pvt Ltd (Client: Axis Bank & NBFCs) | Jaipur, India 06/2022 – 02/2024

- Delivered LOS/LMS, Finacle Treasury, Digital Payments, and Data Migration programs for Axis Bank, RBL Bank, and NBFCs.
- Conducted Business Analysis, requirement gathering, workflow analysis, and gap assessment for lending, treasury, and digital banking transformation projects.
- Coordinated SIT, UAT testing, defect management, and business validation activities for banking and payment applications.
- Integrated core banking systems with PSP networks (UPI, Cards, Wallets) ensuring secure payment processing.
- Executed SQL/ETL-based data migration, validation, and reconciliation activities for banking and treasury platforms including Finnone Neo, MiFin, and Jaguar, ensuring data integrity and regulatory compliance.
- Collaborated with cross-functional teams and vendors to ensure seamless integration with core banking, payment gateways, and CRM-like systems.
- Enabled API-based banking integrations aligned with digital banking and open banking architecture
- Performed API testing and validation using Postman, ensuring seamless integration and secure transaction processing.
- Utilized AI tools (ChatGPT) to assist in requirement clarification, generate edge test scenarios, and speed up documentation in fast-paced delivery cycles.
- Executed data migration and reconciliation for banking systems ensuring data integrity and regulatory compliance
- Managed cross-functional teams with resource constraints, proactively removing blockers, aligning stakeholders, and driving timely releases.
- Managed end-to-end project lifecycle (initiation to delivery) including scope definition, planning, estimation, and execution for banking and fintech solutions.
- Drove Agile/Scrum delivery with sprint planning, backlog grooming, and stakeholder communication, ensuring on-time releases and continuous improvement.

KEY ACHIEVEMENTS

- Delivered multi-domain transformation (lending, treasury, payments) across multiple banks within tight timelines.
- Improved transaction success rate and system stability through optimized API flows and multi-PSP routing.
- Achieved 100% data accuracy during migration, minimizing business disruption.

Sr. Credit & Income Underwriter | Verity Global Solutions | Mumbai, India 04/2021 – 05/2022

- Performed end-to-end mortgage underwriting including HTI, DTI calculation, credit risk assessment, income & asset verification, ensuring compliance with lending guidelines, KYC/AML, and audit standards.
- Supported Business Analysis and workflow validation activities for loan origination and underwriting systems.
- Analyzed credit bureau data and borrower profiles to assess repayment capacity, risk exposure, and loan eligibility, supporting accurate and compliant credit decisions
- Managed complete lending lifecycle (loan origination → underwriting → approval → disbursement) ensuring SLA adherence and high-quality processing
- Utilized Encompass LOS for loan processing, data validation, and workflow management; supported UAT, defect resolution, and system enhancements in collaboration with IT teams
- Performed data validation, reconciliation, and root cause analysis (RCA) to identify discrepancies, improve data quality, and enhance underwriting efficiency and turnaround time
- Supported banking operations, transaction reconciliation, and compliance validation activities ensuring adherence to internal controls and regulatory guidelines.
- Supported lending lifecycle including loan origination, underwriting, and disbursement workflows

Project Manager | ACM Pvt. Ltd | Mumbai, India 02/2015 – 04/2020

- Led end-to-end SDLC delivery of logistics technology solutions, including requirement analysis, system design, development coordination, UAT, and release management, ensuring on-time and high-quality execution.
- Performed business analysis (BRD/FRD, requirement gathering, workflow design, gap analysis) to align supply chain processes with system capabilities and drive optimized solutions.

Sr. Credit and Income analyst | Altisource | Mumbai, India 10/2012- 01/2014

- Performed US mortgage underwriting support, including credit, income, asset verification, and loan document analysis
- Owned end-to-end underwriting decisioning from application intake to final approval, ensuring completeness of documentation, risk assessment accuracy, and adherence to lending policies and regulatory standards.
- Coordinated with credit, operations, and processing teams to drive seamless loan approval and disbursement, reducing turnaround time (TAT) and improving overall underwriting efficiency.

Sr. Project Associate | TCS **|**Mumbai, India 10/2011 – 10/2012

- Project coordination reporting & business analysis in mortgage domain, including requirement validation & documentation.
- Executed QA testing (functional, regression) and defect tracking, ensuring system quality and delivery.

Project Associate | HSBC Bank **|** Mumbai, India 10/2010 – 10/2011

- Managed retail banking operations including payments, settlements, transaction processing (T+1/T+2 reconciliation), and operational reporting while ensuring compliance with KYC, AML, internal audit controls, and regulatory guidelines.
- Supported customer servicing and CRU activities including query handling, issue resolution, transaction monitoring, and SLA adherence across digital banking channels with focus on operational accuracy and governance controls.
- Coordinated with backend operations and technology teams for incident resolution, data validation, reconciliation, process improvement, and root-cause analysis to ensure smooth banking operations and compliance adherence.
- Ensured adherence to banking policies, audit requirements, and risk governance frameworks through validation checks, compliance monitoring, and reporting controls.

Senior Analyst | ADFC (HDFC Bank) |Mumbai, India 05/2008 – 02/2010

- Performed financial analysis and credit risk reporting using CIBIL reports, payment history, delinquency trends, and customer profiling to support underwriting and risk assessment activities.
- Handled retail banking operations including credit card servicing, account validation, transaction analysis, and risk reporting while ensuring accuracy, SLA adherence, and compliance with banking policies.
- Delivered customer support through phone banking and digital channels while assisting in financial investigations, transaction monitoring, and issue resolution to improve customer experience and operational efficiency.
- Conducted credit lifecycle management activities including delinquency tracking, risk assessment, and portfolio monitoring to support financial controls and regulatory compliance.
- Coordinated with business and operations teams for issue resolution, data accuracy checks, and process improvement initiatives

Key Projects

- **OFSAA Implementation –** *ICICI Bank***:** Led end-to-end delivery and support of Oracle OFSAA regulatory reporting modules including LCR, NSFR, ALM, FTP, and CAPAD aligned with RBI and Basel guidelines, achieving 99.5%+ batch success rate, reducing processing failures by 40%, and successfully supporting OCI cloud migration and reporting stability initiatives.
- **Digital Payments Integration:** Implemented UPI, Cards, Wallets via PSP & REST APIs, with multi-PSP routing to improve transaction success and reliability.
- **Data Migration – Lending Systems:** Migrated Finnone Neo, MiFin, Jaguar → LOS/LMS using SQL ETL, reconciliation, and validation, ensuring 100% data accuracy.

Accomplishments

- Received client's appreciation for handling standalone projects.
- Highly appreciated by the customer during my offshore visit.
- Rated as Exceptional performance for this year's appraisal & got appreciation from Clients for documentation work.

Certifications

- Project Management • Business Analysis • Scrum Master • Databricks • Power Bi • Credit and Income Analyst • GenAI

Education

Dr. Babasaheb Ambedkar Marathwada University | **Bachelor of Computer Science** | Aurangabad
