# Mohit Choudhary

## AREAS OF EXPERTISE

- Finacle-7/10/11
- Credit Risk
- Basel-III/3.1
- RWA
- ECL
- PD
- LGD
- AML
- MS-Excel
- Data Modeling
- Business Analysis
- UAT
- BRD
- FRD
- Process Mapping
- AS-IS/TO-BE
- Risk Management
- Regulatory Reporting
- UCP-600
- URDG-758

## INDUSTRY EXPERTISE

- Credit Risk Management
- Regulatory Capital & Basel Compliance
- Core Banking Systems
- Financial Risk Analytics

## EDUCATION

- Post Graduate Diploma in Banking (PGDB)/ MBA | ICICI Manipal University, Bengaluru 2016
- B.Tech (Bachelor of Technology) | Indraprastha Engineering College, UPTU | Graduated: 2013

## PROFESSIONAL EXPERIENCE

**Mohit Choudhary has 10 years of experience as a Senior Functional Consultant specializing in Credit Risk and Regulatory Capital within the Banking industry.** He possesses deep expertise in core banking platforms, having performed end-to-end functional validation on Finacle 7, 10 and 11 across credit appraisal, drawing power calculations and asset evaluation processes. His skill set includes drafting comprehensive BRDs and FRDs, leading UAT cycles, conducting risk and compliance assessments such as PD, LGD, ECL, and mapping AS-IS/TO-BE workflows to drive operational efficiency. Mohit collaborates effectively with credit underwriters, risk officers, IT architects and global stakeholders, delivering data-driven insights through advanced Excel modeling, KPI dashboards and regulatory reporting aligned with Basel III/3.1 standards.

## MAJOR PROJECTS

**Banking – Digital Lending Interface Optimization – Senior Manager – Functional Risk Analyst**

- Designed and documented comprehensive BRDs and FRDs to transform a single-page loan application into a multi-step guided wizard, improving user navigation and reducing drop-out rates.

**Banking – Letter of Credit Compliance Validation Portal – Senior Manager – Functional Risk Analyst**

- Engineered testing logic within Finacle 11 to calculate day variance between shipment and presentation dates, automatically flagging transactions exceeding the 21-day threshold.

**Banking – Overdraft Renewal Automation Platform – Senior Manager – Credit Risk & Process Analyst**

- Mapped legacy 12-day physical overdraft renewal workflow and designed an OCR-driven digital process that cut turnaround time to 48 hours, enhancing customer experience.
- Validated Business Rules Engine parameters in Finacle 10 to automatically bypass renewal for borrowers with >20 % turnover decline, routing cases to manual underwriters for risk assessment.

**Banking – Credit Risk Scoring Engine Upgrade – Senior Manager – Credit Risk & Process Analyst**

- Translated complex credit appraisal rules into functional logic strings that automated PD flagging for BBB-rated borrowers, LGD matrix calculations with 25 % collateral haircuts, and ECL triggers for assets overdue beyond 90 days.
- Integrated RWA and Basel calculations into the scoring engine, aligning outputs with regulatory capital requirements and supporting senior management reporting.

**Banking – Supply Chain Finance H2H Integration – Senior Manager – Credit Risk & Process Analyst**

- Designed functional end-to-end testing plans for a secure H2H API that connected corporate ERP systems directly to core banking, enabling instant invoice discounting.
- Executed data batch testing with intentionally corrupted IFSC fields, identified processing errors, logged defects, and coordinated remediation to achieve successful UAT sign-off.

**Banking – Early Warning Signal Dashboard – Senior Manager – Business Banking Asset Analyst**

- Developed an early warning signal dashboard that aggregated live transaction data to identify stressed credit profiles, triggering automated alerts when fund-insufficient checks exceeded three per month.
- Authored comprehensive test scenarios based on credit policy rules, validating system behavior to lock draw-downs for customers with inventory drops over 25 % during quarterly audits.
