Gaurav Tripathi

AREAS OF EXPERTISE

- Excel
- SQL
- Tableau
- Python
- R
- Go
- GCP
- Data-Engineering
- Generative-AI
- Basel-III/3.1
- CECL
- Credit-Risk
- SAS
- Prompt-Engineering
- Linear-Regression
- Stress-Testing
- IRB-Modeling
- Climate-Risk
- IFRS-9
- Basel-IV

INDUSTRY EXPERTISE

- Credit Risk
- Regulatory Capital
- Banking & Financial Services

EDUCATION

- Executive PG Diploma in Data Science
- PGDM Finance & Marketing
- BE

PROFESSIONAL EXPERIENCE

Gaurav Tripathi has 16 years of experience as a Senior Business Analyst specializing in Credit Risk and Regulatory Capital within the Banking and Financial Services industry. He has led end-to-end credit risk model development, including CECL linear regression, stress testing frameworks such as CCAR and ICAAP, and IFRS-9 integration across corporate lending, project finance, and commercial real estate portfolios. His technical toolkit comprises Python, R, SQL, Excel, Tableau, SAS, and Google Cloud Platform, enabling data extraction, advanced analytics, and automated dashboard creation for real-time monitoring of delinquency trends and key performance indicators. He engages with regulators such as PRA, ECB, Fed/OCC, and OSFI, translating supervisory requirements into actionable test strategies and ensuring compliance with Basel III/3.1, Basel IV, and capital adequacy standards.

MAJOR PROJECTS

Banking – Credit Risk Model Development and Stress Testing – Senior Business Analyst – Credit Risk

- Developed and validated Linear Regression models in accordance with CECL guidelines, conducting rigorous backtesting, sensitivity testing, and stress scenario forecasting to ensure model robustness.
- Designed and executed stress testing frameworks such as CCAR and ICAAP, linking IRB models to IFRS 9 calculations for comprehensive capital assessment.
- Coordinated regulatory interactions with PRA, ECB, Fed/OCC, and OSFI, translating supervisory expectations into actionable project requirements.

Banking – Wholesale IRB Capital and Climate Risk Modelling – Business Analyst IV

- Modeled and validated wholesale IRB capital models, integrating IFRS 9 and climate risk components to align with Basel regulatory standards.
- Produced detailed documentation of model assumptions, data flows, and validation results for senior risk committees and external auditors.
- Collaborated with data engineering and quantitative teams to implement automated data pipelines supporting model recalibration.

FinTech – Credit Risk Analytics and Dashboard Automation – Credit Risk Analyst

- Developed credit risk models using Python, performing bucket analysis to identify potential financial risk exposures across consumer segments.
- Designed automated BI solutions in Tableau, creating recurrent reporting dashboards that visualized delinquency trends and key performance indicators.
- Executed data wrangling and transformation scripts in Python to cleanse transaction data, improving accuracy of DPD calculations.

Software Development – Enterprise Application Engineering – Software Engineer

- Developed multi-screen enterprise application components with role-based authentication, adhering to client specifications and security standards.
- Gathered and analyzed detailed client requirements, producing high-level technical design documents that guided development activities.
- Implemented client-side and server-side validation mechanisms, enhancing data integrity and user experience across the application.
