- Credit Risk
- Market Risk
- Risk Analytics
- Python
- SQL
- Power BI
- Power Query
- Advanced Excel
- AWS
- JIRA
- UAT
- Basel-III/3.1
- Counterparty Risk
- VAR
- EAD
- RWA
- Data Visualization
- Statistical Modeling
- Lean Six Sigma
- Renewable Energy

INDUSTRY EXPERTISE

- Credit Risk
- Regulatory Capital
- Banking & Financial Services

EDUCATION

- POST GRADUATE DIPLOMA IN MANAGEMENT (MBA)
- BACHELOR OF ENGINEERING

PROFESSIONAL EXPERIENCE

Rishabh Chaturvedi has 9 years of experience as a Risk and Data Analyst specializing in Credit Risk and Regulatory Capital within the Banking and Financial Services industry. He leverages advanced Python, SQL, Power Query and Power BI to transform financial datasets into actionable risk models, exposure monitors and strategic dashboards. His portfolio includes credit risk profiling, delinquency tracking, market risk visualization, and development of risk analytics solutions for trading and treasury functions. He has led collaborations with underwriting, product, and technology teams to design scenario analyses, model performance tracking, and automated reporting pipelines. Additionally, he possesses strong expertise in regulatory frameworks such as Basel-III/3.1, counter-party risk metrics, VAR and EAD calculations, and has delivered risk insights to senior stakeholders.

MAJOR PROJECTS

Banking – Credit Risk Portfolio Monitoring – Risk and Data Analyst

- Developed analytical models to assess customer credit profiles, transaction patterns and bureau data, enabling proactive credit strategy adjustments.

Renewable Energy Trading – Market Risk Management – Risk Advisor

- Implemented market risk measurement frameworks and built interactive Power BI dashboards that visualized real-time open positions, P&L and key financial metrics for trading desks.
- Collaborated with trading teams to conduct forward-looking analyses, optimizing hedging strategies and aligning exposures with the company's risk tolerance thresholds.

Financial Services – Operational Risk Reporting – Business Operation Analyst

- Defined and documented standard operating procedures that streamlined credit and market risk report generation, improving data integrity and reducing processing time by 20%.
- Designed and delivered interactive dashboards using Power BI and SQL, translating stakeholder requirements into visual analytics that supported strategic business decisions.

Mortgage Lending – Credit Analysis – Credit Analyst

- Reviewed and analyzed US mortgage loan applications against FHA, FNMA and FHLMC guidelines, assessing credit scores, LTV ratios and property valuations to mitigate underwriting risk.
- Evaluated borrower income, assets and debt metrics using Encompass and Desktop Underwriter, generating comprehensive credit reports that informed loan approval decisions.

Retail Banking – Personal Loan Credit Management – Associate Credit Manager

- Assessed personal loan proposals against credit policies and TAT standards, conducting data analysis and dashboard creation to improve loan processing efficiency.
- Managed external vendors and quasi-underwriters, delivering training and performance monitoring that enhanced underwriting quality and reduced turnaround time.

Technology – Research Applications Development – Software Engineer

- Troubleshot and upgraded research application platforms, integrating third-party APIs and ensuring stable Java and Python code deployments across server environments.
- Analyzed user interface and server issues, delivering compatible and efficient code solutions that improved application performance and user satisfaction.
